PROFILE

Enthusiastic Full Stack Developer with over 2 years of experience in Node.js and React, dedicated to designing and implementing efficient systems in complex environments. Proven ability to work on high-load applications in dynamic settings and excited about contributing to innovative payment solutions. Adept at collaborating with cross-functional teams and leveraging cloud technologies to enhance application performance and reliability.

EXPERIENCE

Full Stack Developer

Independent Contractor | March 2024 - Present

- Engaged in cloud-based developments, utilizing AWS and serverless architecture to implement scalable applications tailored to the needs of diverse clients.
- Developed and maintained high-performance Node.js servers and integrated front-end applications with React to deliver cohesive user experiences.
- Worked with cross-functional teams to design and deploy innovative solutions in a variety of domains.

Network Engineer

Via Transportation | October 2023 - March 2024

- Monitored and maintained server networks, leveraging AWS, Lambda, and Jenkins to ensure system reliability and performance.
- Collaborated with teams to implement emergency fixes and optimize infrastructure for better data flow across distributed systems.

Full Stack Developer

Intelligence Traffic Control | September 2022 - October 2023

- Designed and developed web applications and GUIs using Node.js and React, focusing on traffic monitoring

Excellent verbal and written skills

Capable of explaining complex technical concepts to non-technical stakeholders

systems and computer vision applications.

- Participated in infrastructure planning, ensuring robust performance and scalability of applications for internal and external stakeholders.
- Fostered collaboration with product managers and designers to create innovative solutions that met user needs.

Video Producer

Independent Contractor | 2017 - 2022

- Developed various applications and integrations tailored to client needs, focusing on delivering high-quality, scalable projects.
- Managed end-to-end production of video and digital content, working with clients in e-commerce, festivals, games, and animations.
- Received international recognition for digital projects, showcasing a creative approach to problem-solving and innovative content development.

EDUCATION

ITC (Israel Tech Challenge)
Full Stack Developer

National Technical University of Ukraine
Bachelor of Engineering
